

All Seasons Spa Covers vs Others
Producing High Quality Hand Crafted Spa Covers for over 20 Years

Superior Craftsmanship is Superior Value

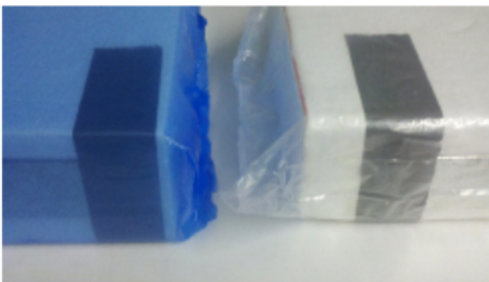

All Seasons

Double stitched and padded for greater strength and more ergonomic.

Others

Single stitched with no padding results in a weaker, less comfortable handle.

All Seasons

C-Channel support extends to nearly the end of the core, giving the cover a greater support structure!

Others

Short C-channel support, increases likelihood for breakage.

All Seasons

Superior heat sealing, 4mil plastic wrap, and greater craftsmanship create a tighter seal resulting in a drier core!

Others

Thinner heat seal thinner plastic wrap, and sloppy craftsmanship create a greater likelihood for the core to become saturated over time.

All Seasons

Extra reinforcement on handle backing ensures that our handles will outlast any other on the market!

Others

No reinforcement on handle backing results in handles tearing out over time.

All Seasons

Adequately perforated cover bottoms allow water to drain properly and overall aesthetic appeal make our covers the obvious choice.

Others

Insufficient perforating on cover bottom causes the cover to retain water and soak the core.
